HYGIENIC SOLUTIONS ECO TERRAZZO FLOOR

Hygienic Solutions Eco Floor Terrazzo is an advanced, professional grade Terrazzo topping made using selected additives, aggregates and special mineral fillers and eco binder. It is suitable for use in both chemical and heavy traffic environments.

Hygienic Solutions Eco Floor Terrazzo does not suffer from shrinkage unlike typical epoxy and cement based Terrazzo systems and has very high abrasion resistance. These characteristics enable this product to be used for the production of high performance and durable seamless floors both interior and exterior.

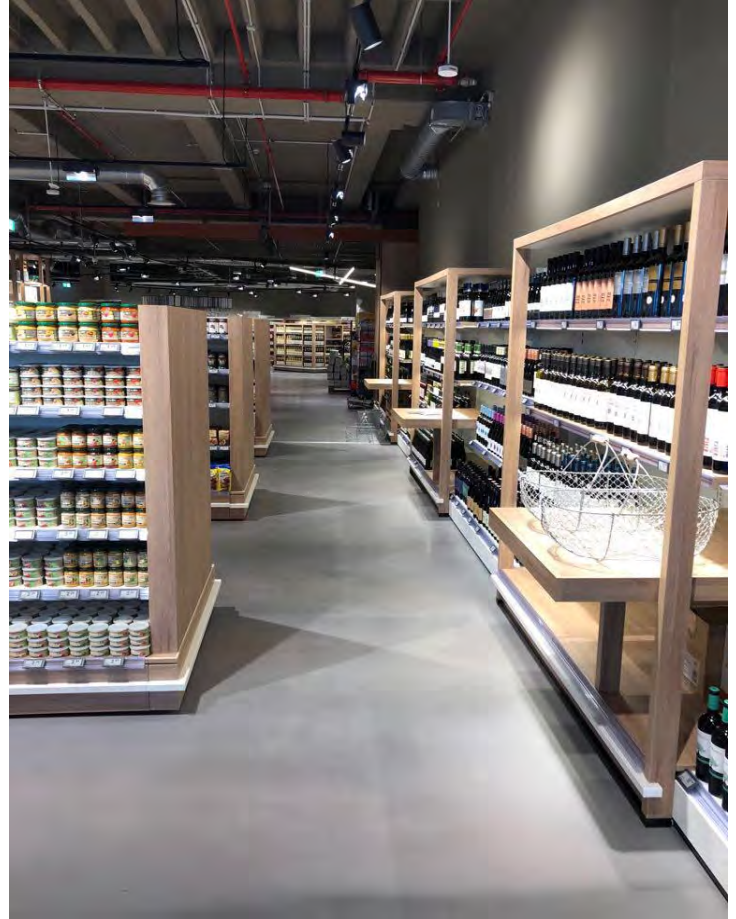

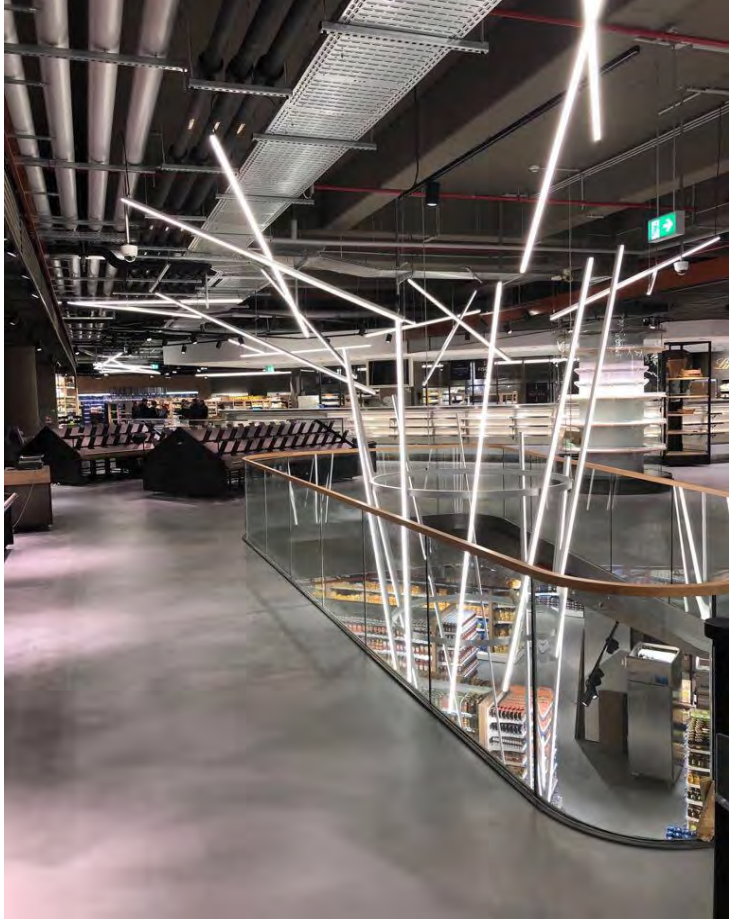

Due to its unique strength at minimum thicknesses, the material consumption is low and allows for faster application times than traditional epoxy and cement based Terrazzos. This results in a system that can be applied at half the cost of traditional Terrazzo systems. Its formulation is based on harmless, VOC-free non-hazardous raw materials.

HYGIENIC SOLUTIONS ECO CONCRETE EFFECT FLOOR

Hygienic Solutions Eco Concrete Effect system is made from an ECO binder technology that is derived from recyclable Fly Ash from steel melt plants. This means Hygienic Solutions Eco systems has no VOC's, no isocyanates, no diisocyanates or any other harmful products that are harmful to the planet or man.

The product is naturally white in colour and can be pigmented to any RAL colour or printed on with a stencil for patterns and pictures for a decorative flooring system.

HS CUSTOM DESIGNED FRP WALL PANELS

HS FRP fire rated, Hygienic Wall System is made of fiberglass reinforced plastic, known as Glasbord. It is durable, flexible, hygienic, will not mould or mildew and will not rot or corrode. It has excellent resistance to chemicals and moisture and has a Class A fire rating for flame and smoke spread.

The product is available in a range of designs and colours from wood effect, stone effect, concrete effect and custom design. We can take any picture or photo and provide this on our FRP wall panel system as shown below. The system is quick to install and provides a cost effective custom decorative system for clients.
